

Dear Commissioners,
Please do everything you can to maintain the integrity of the XM band by making sure that satellite radio remains what it you intended it to be... a national service.

There is absoutly no way that a satellite provider can devote the time and resources necessary to serve locally each and every community that is currently served by a good, strong local broadcaster.

Satellite is a good product for what it is, a national service. Please do not allow XM and Sirrus to try to become what that aren't.

Sincerely,

Gene Dow
Vice President & General Manager
Pecos Valley Broadcasting Company
